

MULTIPACK ROBOT

Specifications

2011 Jongerius Hanco BV

Multipack Robot

Highlights

Multipack Robot is a bagloading machine for so-called multipacks. Not only for pre-wrapped chips, also frozen food, such as frozen croissants and pastry, is popular. Loose buns too, toys, pre-wrapped tortillas, cloth, tissues etc.

Our multipack bag can be transparent because of the neat and aligned product presentation inside the bag

- Safe for delicate products since handling is horizontal.
- Square gusseted bottom fold to guarantee a stable product placement on store shelves.
- Handles bags with carrier grip and other features too.
- Easy horizontal feeding of the machine, often manual.
- Neat aligned product presentation, so bags may be transparent.
